forza heavy-load bed

Nursing and hospital version

Nursing and care of overweight or adipose patients often is connected to increased treatment risk and high effort for the nursing staff.

Overweight patients – with a weight of 150 kg and more – are often not the exception in nursing work. This brings special challenges for nursing staff as well, since standard nursing beds or aids often do not have enough load capacity.

3 Model Versions

The forza nursing bed series – with the models forza basic, forza trend and forza aktiv – facilitates everyday work for nursing staff and family members acting as nurses.

Extremely stable construction – load up to 500 kg

With a load capacity of up to 500 kg and the many adjustment options of a “normal” nursing bed, forza permits perfect positioning and freedom of movement for heavy persons. With its stable construction, it is ready for any demands of everyday nursing work.

forza in 3 different versions

- Standard model **forza basic** with a height adjustment of 40 - 80 cm
- **forza trend** with head and foot lowering
- Top model **forza aktiv** as sitting and rising bed with exit on the foot end

forza basic heavy-load bed

The strong basic model

forza basic is the standard model of our forza nursing bed series. The heavy-load bed has an electrically adjustable back, thigh and lower leg rest and can be adjusted from 40 - 80 cm in height.

- Electrically adjustable back, thigh and lower leg rest via hand switch
- Height adjustment of 40 to 80 cm
- 4-fold separated steel grid lying surface
- Ground clearance for patient lifter
- Available with continuous or 2-part side grids
- Carriers up to 250 kg, 350 kg or even 500 kg
- Stable and vibration-free
- Standard pattern: light beech other patterns on request

Setting the lying surface low

Raising the lying surface

Head and foot section adjustment

forza trend heavy-load bed

Lowering of foot or head end (Trendelenburg / Antitrendelenburg)

The forza trend has a Trendelenburg function (lowering head/foot end) and convinces with its stable construction. It has all the standard functions of a nursing bed and can be individually adjusted in height between 40 and 80 cm. Ideal for everyday nursing of adipose and overweight persons.

- Electrically adjustable back, thigh and lower leg rest via hand switch
- Lowering head/foot end (Trendelenburg/Anti-Trendelenburg lockable)
- Height adjustment from 40 to 80 cm
- Available with continuous or 2-part side grids

Lowering the lying surface

Raising the lying surface

Lowering foot end (Trendelenburg)

Lowering head end (Anti-Trendelenburg)

forza aktiv heavy-load bed

The sitting and rising bed with its exit at the foot end

With its exit on the foot end, the heavy-load bed forza simplifies getting into and out of the nursing bed. Many other adjustment options support the nursing staff and family performing nursing tasks especially with the different types of patient nursing, particularly facilitating care in the genital area, of the feet and the entire body. The options for perfect positioning and movement of the patient permit comfortable sitting and rising positions.

- Electrically adjustable back, thigh and lower leg rest via hand switch
- Height adjustment from 40 to 80 cm
- Sitting and rising function electrically adjustable via hand switch
- Beautifully shaped handholds for getting into and out of the heavy-load bed easily
- Removable, beautifully shaped foot bed
- 4-fold steel grid lying surface
- Available with continuous or 2-part side grids
- Carriers up to 250 kg, 350 kg or even 500 kg
- Stable and vibration-free

Resting position

Sitting and nursing position

Sitting and exit position

forza aktiv mit durchgehenden Seitengittern

forza klinik

All benefits of the forza hospital version

The forza heavy-load bed is also available in a hospital version.

All properties and options of the basic function apply here as well.

In hard everyday use in the hospital, stability, load capacity and function are needed in any situation.

The heavy-load bed forza by Mühle-Müller easily meets these requirements and turns out to be a reliable companion for patient and nursing staff.

forza Wood Patterns

All common wood patterns

The forza models are available in all common wood patterns:

- Cherry
- Walnut
- Beech
- Oak
- Birch
- And many others
